# Robust

To achieve an extra lively and natural look, the products in this collection are planed with chisels. This creates a cross-grain with robust appearance in various places

*Om een extra levendige en natuurlijke uitstraling te krijgen, zijn de producten in deze collectie geschaafd met beitels. Hierdoor ontstaat op diverse plekken een dwarsnerf (kruisdraad), die een robuuste uitstraling geeft.*

# Antique

The extra rustic collection is characterized by hand-scraped boards in which the characteristic and natural open cracks and knots are manually accentuated. The unfilled open knots and cracks form the basis for this collection.

*De extra rustieke collectie kenmerkt zich door handgeschraapte planken waarin de karakteristieke en natuurlijke open scheuren en noesten handmatig worden geaccentueerd. De ongestopte open noesten en scheuren vormen de basis voor deze collectie.*

# Matterhorn

Antique Living collection

# Knotting Hill

The structure of this lively and extra rustic collection is based on a naturally deformed surface, characteristically band sawn and brushed. The naturally deformed cracks, head cracks and knots were subsequently scraped by hand, and partially filled.

*De structuur van deze levendige en extra rustieke collectie is gebaseerd op een natuurlijk vervormd oppervlak, kenmerkend bandgezaagd en geborsteld. De natuurlijk vervormde scheuren, kopscheuren en noesten worden vervolgens nog met de hand geschraapt en gedeeltelijk gestopt.*

# Shrunk

The structure of this lively and extra rustic 'Shrunk' collection is based on a naturally deformed and subtly brushed surface. Only here and there some band saw structure may be present. The naturally shrunken cracks, end-cracks and knots are subsequently hand-scraped, and partially filled.

*De structuur van deze levendige en extra rustieke 'Shrunk' collectie is gebaseerd op een natuurlijk vervormd en subtiel geborsteld oppervlak. Slechts hier en daar kan enige lichte bandzaag structuur voorkomen. De natuurlijk gekrompen scheuren, kopscheuren en noesten worden vervolgens met de hand geschraapt en gedeeltelijk gestopt.*
